

Are You in

# The Cloud?

## 80%

of businesses agree that **paper content and processes are a huge impediment to remote access** and teleworking.

- AIIM, 2016

## 42%

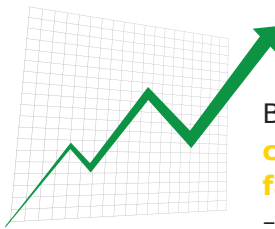

of businesses report the **key drivers** to moving to the cloud are **improved backup services**, and 40% report the **need for 24-hour access**.

- Cloud Tweaks, 2015

## What is the Cloud?

The cloud provides a simple way for companies to run their business. Instead of developing, maintaining and running content management applications themselves, they access everything through the internet.

Businesses that **operate in the cloud grow almost 20% faster** than those that don't.

- Skyhigh, 2016

**75%** businesses **felt the security offered by cloud providers is better** than the security of their own servers.

- AIIM, 2016

## How does cloud help?

Remotely access files to ensure **efficiency**.

Maintain security **control** to ensure compliance.

Save **money** by eliminating IT costs.

"Our old paper intake process was difficult for our patients, because they had to complete a paper intake packet each time they visited one of our facilities. Now with ImageSilo®, they only do paperwork once—on their first visit. After that, we can pull up their records instantly, which allows us to provide better care much more quickly. The information is always there when we need it."

- Jocelyn Scott, Director of Medical Records

"I don't know that we could do the business we do without ImageSilo. The physical aspect of delivering what our partners need without the system would be impossible."

- Ginger Heckman  
Manager of Business Development

"We have saved nearly \$10,000 a year in AP processing costs alone thanks to ImageSilo."

- Pat Myers  
Accounts Payable/Receptionist

Implement cloud to maximize ROI and increase efficiency, control and money with **ECMNOW!**
